(54)

Information exchange apparatus and information exchanging method

(57)

There is disclosed an information exchange apparatus in which apparatus name information and address information of a display (140) or headphone (120) are transferred to a DVD reproduction apparatus (100) from the display (140) or headphone (120) via a path of an infrared ray or the like different from a radio path for exchanging information. The information are registered

in the DVD reproduction apparatus (100). The DVD reproduction apparatus (100) on a transmission side transmits video and audio information based on information concerning the display (140) or headphone (120) as a reception side registered in the reproduction apparatus, and the display (140) or headphone (120) on the reception side receives the video and audio information transmitted to the display or headphone.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 30 4461

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
